

Revision Note
Operating Procedures:
User Enrolment and Administration
Edition 2g

Bolero International Limited
14 January 2003

The Operating Procedures describing the Bolero System have been changed in the following respects:

- **User Enrolment:** The chapter entitled 'User Enrolment' has been revised to enable a third party to assist the User in enrolling and to permit certain simplifications such as a single enrolment application for both Bolero International Limited and Bolero Association Limited. (The single application is nevertheless considered independently by each organisation.) The revisions of this chapter have been approved by both Bolero International and the Bolero Association.
- **User account termination:** Bolero International has added a new section to the chapter on User Account Administration to describe how a User account is closed.

Except as noted above, the Operating Procedures have not been altered.
